Attention: To Whom It May Concern

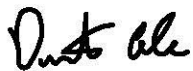

Jewer Bailey Consultants have worked with Derek Penney Electrical Ltd. on several projects dating back to 2012. We would like to extend our sincere recommendation for Mr. Derek Penney and his company on any future projects similar to the below, and also express our interest to work with him further. Derek worked with JBC, as a dedicated team member and was a great asset throughout the full scope of each of the below referenced projects.

Some of these projects include: (1) A detailed site review and assessment of all electrical equipment and systems at the Battery Hotel in St. John's, NL; (2) A detailed site review and assessment of federal government coast guard buildings in the St. John's, NL area; (3) Collection of all site information associated with existing electrical systems at Federal Government Buildings to allow JBC to perform short circuit and coordination studies for these buildings; and, (4) Collection of all site information associated with existing electrical systems at several federal government buildings in Newfoundland to allow JBC to update and provide accurate single line as-builts for these buildings.

JBC would like to express our confidence in Derek and our desire to work with him and his team on future projects. Please feel free to contact me if you would like to discuss further.

Yours very truly,

JEWER BAILEY CONSULTANTS LIMITED
